Web Programming - WEBD 221
Assignment #2 - September 30th, 2013

Files Can be downloaded from github.com/drewminns/assignment2

Assignment Overview:
The purpose of this assignment is to test your knowledge of concepts covered in the last 3 weeks that include working with extended CSS languages, preprocessing CSS working with a grid and using Github.

Your task is to create a 3 page promotional website for a musical artist of your choice written with LESS. These pages must include a home page, an about page, and a tour page.

Using the styleguide provided, determine what variables and mixins are needed to accomplish the task. Using the information from the styleguide, include the required fonts from Google Web Fonts.

Be sure to use the grid provided which requires no presentational classes. This ensures a consistent layout structure and proper spacing between all elements.

For content, Lorem Ipsum can be used and for images, placeholder images from **http://placehold.it** can be used.

For compilation, use Codekit, LESS App or SimpLESS

Requirements:
Creation and usage of provided Variables plus 3 new ones
Creation and usage of provided mixins plus 3 new ones
Correct usage of Grid System for all layout elements.

Assignment is due Monday October 14th at 11:59pm and must be uploaded to your github account and a link sent to my email at dminns@gmail.com.

Marking Scheme
Usage of proper semantic elements / 10pts
Creation and proper usage of Variables / 15pts
Creation and proper usage of Mixins / 15pts
Organization using nested css rules / 5pts
Usage of Grid / 10pts
Organization: 5pts
Total / 50pts
